---

### REMARKS

Claims 1-20 are pending in this patent application. By this amendment, claims 14-20 have been withdrawn from further consideration. Reconsideration of this patent application is respectfully requested.

### Restriction/Election

In response to the restriction requirement set forth in the October 3, 2003 Office Action, Applicant restricts examination to the invention of Group II (claims 1-13). Applicant requests that claims 14-20 be withdrawn from further consideration pending a decision regarding the filing of a divisional patent application.

Applicant elects to prosecute the species of Group L (Figures 51-52). All claims 1-13 are readable on this species (Group L). And although none of pending claims 1-13 recites the term "original catheter" or "locking system", Applicant elects group 1 (Figure 3) and group aa (Figure 6) to comply with the requirements set forth in the 10/3/03 Office Action and in case this patent application is somehow amended in this regard.

Conclusion

A prompt and favorable action on the merits is respectfully requested.

Respectfully submitted,

Paul J. Maginot  
Attorney for Applicant  
Registration No. 34,984

Date: November 24, 2003
